SUMMARY

Full Stack Developer with hands-on experience building scalable, high-performance web applications using React, Node.js, Next.js, and NestJS in agile and production environments. Experienced in designing secure RESTful APIs, implementing authentication and authorization systems, and integrating payment solutions. Proven background across freelance, internship, and production environments, with a strong focus on clean architecture, security best practices, and backend performance optimization.

EXPERIENCE

Beyond Automated — Full Stack Developer, Contractual *Jul 2026 – Oct 2026*

- Built booking and access-control features (bookings, machines, staff, customers, and locations) for a multi-tenant SaaS platform using NestJS, Payload CMS, and PostgreSQL.
- Enforced multi-tenant data isolation at the database layer using PostgreSQL Row-Level Security (RLS) across bookings, sessions, and audit logs.
- Integrated Stripe payments (Checkout Sessions, payment intents, and webhooks) and built automated access-credential generation triggered on successful payment.
- Implemented staff authentication with session-refresh and remember-me flows, wiring Next.js login/dashboard route gating to a NestJS auth API using TanStack Query.

UpaJuan — Full-Stack Developer (Personal Project) *Mar 2026 – Present*

- Building and deploying a production-ready full-stack web app for property, tenant, lease, and rent payment management using TypeScript, React 19, Next.js 16, NestJS 11, PostgreSQL, Prisma ORM, Redis, Tailwind CSS 4, Turborepo, and Vercel.
- Launched a live waitlist that stores sign-ups in PostgreSQL and sends a branded welcome email (Resend), with one-click unsubscribe, spam protection (Cloudflare Turnstile, rate limiting), and database updates applied automatically with every release.
- Designed a secure tenant login with one-time email codes (OTP) and fast access checks, so each tenant sees only their own information.
- Implementing PostgreSQL Row-Level Security (RLS) so each landlord's data is isolated at the database level, and one account can never read another's records even if application code has a bug.
- Wrote and maintained automated tests with Vitest and Playwright against a real PostgreSQL database, improving reliability before each release in a Clean Architecture and Domain-Driven Design codebase.

Holy Protocol — Full Stack Developer (Backend Focused), Contractual *Aug 2025 – Dec 2025*

- Built and maintained backend services and REST endpoints in NestJS/TypeScript, implementing secure authentication with Better-Auth for production application workflows.
- Implemented decentralized storage via Ardrive for blockchain-based content persistence.
- Integrated Stripe and Stripe Connect for payments and affiliate payouts.

Clairvoyance — Full Stack Developer, Intern *May 2023 – Feb 2024*

- Developed backend features for a threat intelligence platform using the MERN stack and TypeScript.
- Implemented JWT-based authentication and role-based authorization.
- Integrated external threat intelligence APIs including Shodan, VirusTotal, Censys, Fofa, and Urlscan.

BytesMe — Full Stack Developer, Freelance *Oct 2022 – Jan 2023*

- Built a full-featured URL shortener using Next.js, Prisma, Clerk, and Shadcn.
- Implemented admin and user dashboards for link creation and management.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, PHP, Python

Frontend: React, Next.js, Tailwind CSS, Vue, Nuxt, Shadcn, Radix UI

Backend: Node.js, Express.js, NestJS, Laravel, REST APIs

Databases & Tools: MongoDB, MySQL, PostgreSQL, Prisma, Firebase, SQLite, Redis, Git, Figma, Docker, Wordpress, PayloadCMS, Strapi

SOFT SKILLS

Communication, Problem-Solving, Teamwork, Adaptability, Time Management, Reliability, Critical Thinking, Client-Focused, Self-Motivation, Collaboration

EDUCATION AND TRAINING

Bachelor of Science in Computer Science — STI College, Caloocan City

Bachelor of Science in Computer Science — AMA College Caloocan

Technical Training — Xavier Technical Training Center, Caloocan City

HOBBIES AND INTERESTS

Technology Exploration, Trading Stocks & Crypto, Cycling, Gym
